If you are considering a job change, first take [The CALL](#) so you make the **right** change.

"Work smarter, not harder."

Time is a precious commodity. We all have the same number of hours in a day, and they are limited. iMoneyCoach has come across a few ways for you to save time (and money!) because we know how valuable it is.

[Remember the Milk](#) to do list organizer (online and for Smartphones or iPads) – This tool is a great way to make sure you remember to pick up the milk, drop off the dry cleaning, or call your financial advisor. This is an application that you can use online or on your Smartphone/iPad/iPod. When you create a FREE account with Remember the Milk, you can create your own tasks and to-do lists as well as send them to other contacts (i.e. maybe it's your spouse who needs to remember the milk).

When you have your list with you on your mobile device, you don't have to worry about carrying around a variety sticky notes and lists made from scrap pieces of paper. You have the information you need at your fingertips in an easy-to-use format. Getting organized is a great way to save time and money. You can get done everything you need to without using precious brainpower trying to remember everything or time having to run back out to do the things you forgot.

[Bubbl.us](#) mind mapping tool – Organize your ideas in a way that makes sense to you. Bubbl.us was created by 2 guys in a coffee shop who wanted to offer a

simple way for you to brainstorm ideas. You can create a linear chart or move the bubbles all around the “map” in a way that works for your brain. Mapping out ideas first is a great way to save time and money when starting a project. You can print and share your charts too!
