### Easy to Save Money with a QR Reader

Want to save money and learn about great deals? A QR reader for your iPhone, iPod, Blackberry, or Android can come in handy...and we would know! iMoneyCoach can now be found with a QR reader!

You may have noticed these codes that are popping up all over the place now – in newspaper ads, on Taco Bell cups, on ValPak mailers, at the Ikea Family kiosk, and more.

So what are they? QR stands for Quick Response. These codes are similar to the barcodes we are all familiar with, but now your Smartphone or iPad can read them and take you to all sorts of information and websites. You might see a QR code on an add for a Chinese restaurant. When you scan the code you are taken to their online menu where you can not only see what they offer but also place an order right away! The QR codes are quick ways to get connected with companies and find great deals, including the latest iMoneyCoach deals and products.

Where can you get a good QR Reader? There are numerous options out there when you search the App store on your Smartphone or iPad. Here are some FREE readers we have come across:

iPhone and Android: Google Goggles in the [Google Search app](#) can read barcodes PLUS do some incredible other things. You can take a picture of a

landmark or logo and get information about it right away!

Blackberry: [QR Code Scanner Pro](#)

If you want to test out your new QR Reader, you can try it with the code below. Then let us know what you think!
