An "iMoneyMinute" is an idea that in less than one minute will give you a way to save time, save money, make money, or reduce your financial risk.

6 Apps to Help You Save Time and Money

We have received some great response to our emails with useful money-saving apps for Smartphone and iPad users. So here are a few more that may come in handy and keep money in your wallet:

1. [Key Ring App](#) – If you get tired of carrying around a stack of rewards cards, you can use this FREE App on your Android or iPhone to store all of your rewards cards and scan your screen at the store. Never carry plastic or paper loyalty, membership, library cards or coupons again! You can also share your cards so that you and your spouse or kids can save up rewards together. This is a great way to organize your wallet to save time and money. See this video on the [Key Ring App from ABC News](#).
2. [Snapguide](#) – This iPhone (and iPod or iPad) app is a great place to find step-by-step guides on any number of projects. And it lets you create guides to help others. Say, for example, you would like to be able to still use makeup that is broken and crumbled in a container instead of having to buy a new compact, see [this guide](#). You can search for guides [here](#). If there is something you know how to do well and want to share with your friends or clients, you can easily take pictures with your Smartphone through the process and add instructions, and voila!
3. [CheckPlease](#) app for Droid and iPhone – This app allows you to easily calculate the tip when dining and can also split up a bill among diners. All you do is enter the bill amount, the percentage you would

like to tip, and the number of people splitting the bill. No more confusion about how much to pay or one person getting stuck in the awkward and unfortunate position of footing the remainder of the bill!

4. [Coupon Sherpa](#) - lets you use coupons at stores by scanning your device, no more clipping! Save 10%, 15%, or more just by pulling up your coupon on the app for the cashier to scan or enter into the register. Works with iPhone, iPod Touch, and iPad. Here is a [video of Coupon Sherpa](#) featured on Denver's Channel 2 news.
5. [CompareMe](#) – helps you stretch your budget by giving you an accurate cost comparison. If store A gives you 10 ounces of a product at a certain price, but you can buy 50 ounces at another store for another price, you can enter all of the information into this app to see which is the better deal. Also good for figuring out if an item on sale is really a better deal than the store brand item right next to it.
6. [Skype](#) – is now free for your Android or iPhone! Use this app to make video calls to friends and family for free, without using your calling plan minutes.

We are always looking for apps that are truly useful that we can share. If you have found an app that helps you save time and money, please let us know so we can pass along the savings!

We hope the iMoneyMinute is useful to you. If you have a different email address you would like us to use, or if you would prefer to no longer receive the iMoneyMinute emails, please email us at coach@imoneycoach.com.

We would also love your feedback on our emails! Please fill out [this short survey](#) to help us better serve you.
