

An "iMoneyMinute" is an idea that in less than one minute will give you a way to save time, save money, make money, or reduce your financial risk.

Dear Friend,

We have come across several sites with software that can reduce threats to your PC while saving you money at the same time. This list contains recommended software that provides security essentials and can be downloaded for FREE:

- Antivirus - [Alwil Avast](#) Edition 4.7
- Antispyware - Install [Microsoft Windows Defender](#) and [Spybot Search and Destroy 1.5](#)
- Software firewall - [ZoneAlarm](#) 7.0 for Windows XP, 2000 of 7.1 for Vista
- Rootkit detection - [AVG](#) Anti-Rootkit claims to defend against software that can take control of your computer. While untested by consumer reports, it is still the only software that claims to protect against this malware.
